

Custom Solutions, Cost Reductions & Return On Investment

Flexible Automation allows multiple products to run on your production line, offers quick or even push-button changeover, and can be easily re-programmed and tooled for new products and future expansion.

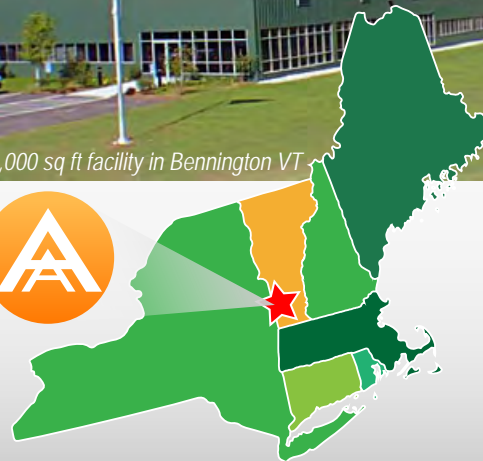

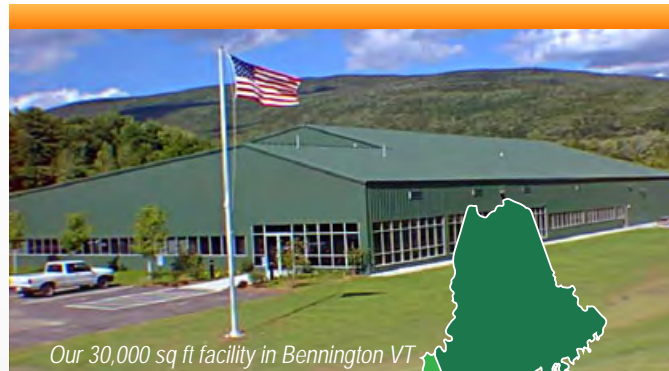

Our 3 decades of machine design experience allow us to offer innovative solutions to your most demanding automation projects. Every machine is designed to the highest standard to perform reliably in its operating environment. Every component detail, down to material and finish, is designed specific to the application.

Abacus services its systems anywhere in the world. We can maintain, re-program or re-tool our systems upon your request. Parts and Service excellence are key to our high industry reputation and happy customers.

We Bring Diverse Technology Experience

- Process Development
- Mechanical Engineering
- Electrical Engineering
- Software Programming
- Drafting, Analysis & Archiving
- Replacement Parts & Supplies
- Full Customer Service
